🌐 [LinkedIn](#) | 📄 [GitHub](#) | 🌐 [Web Site](#)

Profile

Experienced Backend Engineer with expertise in **C#, Node.js and SQL**, building reliable and efficient systems. Currently contributing to **embedded development** and large-scale refactoring in **C++**. Focused on performance, clean architecture and effective collaboration across teams.

Skills

Languages & Frameworks: C#, C++, .NET, ASP.NET, Node.js, SQL, MQTT, CMake

Backend & Systems: REST APIs, Windows Services, Database Design, System Design

DevOps & Tools: CI/CD, Docker, Git, Jira, Agile

Familiar With: WinForms, Kubernetes, Grafana, Angular, React, Flutter

Experience

Backend & Embedded Software Engineer | Galcon Computerized Control Systems April 2023 – Present

Develop smart farm controllers using **C#, C++, .NET, Node.js, SQL Server, MQTT and Redis**

- Build and optimize **REST APIs** and backend communication servers
- **Embedded involvement:** actively contribute to a major refactoring replacing native TCP with **MQTT** and migrating configuration from device registers to a database. Develop IoT device logic using OOP principles and clean architecture
- Design and maintain database structures and system-level architecture in collaboration with product and technical leadership
- Work in an Agile team using Git and Jira
- Built a scalable load-testing tool to simulate thousands of devices
- Developed a desktop tool using WinForms to track and simulate Redis messages
- Actively participate in all major initiatives across the system

Full Stack Developer | Minicy Catom LTD August 2021 – March 2023

Developed and maintained an energy control system using **C#, ASP.Net and SQL Server**

- Designed database structure
- Optimized SQL procedures, reducing report and billing generation time
- Developed Windows Services for background tasks

Education

Full Stack Developer | John Bryce, Haifa March 2020 – April 2021

Graduated with honours

Programming Engineer | ORT Braude, Karmiel October 2018 – March 2020

Paused due to personal circumstances

Electro-mechanical Junior Engineer | ORT Braude, Karmiel October 2015 – June 2017

Graduated with honours

Projects

WorkingHoursAPI | 2024 – 2025 | [Git](#)

Technologies: C#, PostgreSQL

Built a REST API for tracking work shifts. Practiced PostgreSQL management with pgAdmin and data access using Entity Framework Core.

CMake Project | 2022 | [Git](#)

Technologies: CI/CD Actions, CMake, Docker, C++

Created a cross-platform C++ project using CMake and Docker with automated CI/CD pipelines.
